

Declaration of compliance regarding the registration, evaluation, authorization and restriction of chemicals according to regulation

EC 1907/2006 (REACH) of the European Union

elobau operates under the EU Regulation 1907/2006 (REACH) of December 18th, 2006 as a downstream user (producer of products). Therefore, we will meet all requirements placed on us by the REACH Regulation and ensure the resulting reliable delivery. All products supplied by us are no products within the meaning of the REACH regulation. Therefore, we are not obliged to undertake preregistrations and registrations of substances within the meaning of REACH.

We are in constant contact with our suppliers. As a downstream user, we have pointed our suppliers to the existing pre-registration or registration for affected manufacturers and importers of chemical substances and encouraged them also to work with their upstream suppliers to comply with the requirements of this Regulation.

According to current knowledge, no substances from the current candidate list (SVHC list) at a concentration of more than 0.1% by mass are included in the materials we use.

If we notice that our products are notifiable under Article 33, we will inform you accordingly.

This declaration was created and published based on currently applied laws and regulations and to our best and current knowledge. The customer is obliged to verify the suitability the purchased products for the intended use, and must perform all necessary tests to their own responsibility in case of deviation from the intended use.

This document was produced electronically and is valid without signature. Printed copies are not subject to the amendment service. The current version can be found at elobau.com
